

HOUSEMATE

MODELS JP81 · JP 101 · CAST BODY PUMPS

MODELS IN 600 AND 750 WATT MOTOR OUTPUT POWER

- Electrophoretic coating of internal metal components where in contact with water, to provide excellent resistance to corrosion.
- Impeller / jet / venturi in 'matched' design to reduce water turbulence noise, especially at low pressure - high flows.
- Improved, quieter performance

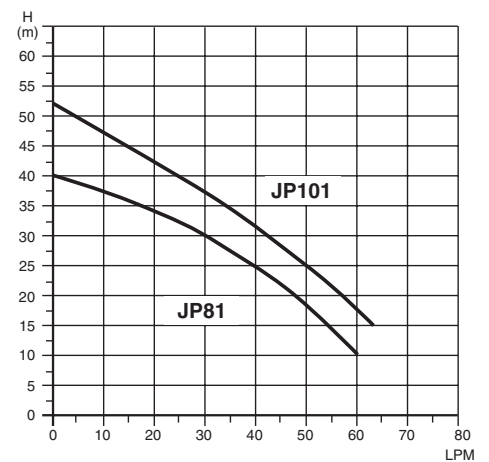

FEATURES:

- Full cast body and end bracket with electrophoresis coating
- 304 grade stainless steel pump shaft
- High quality C3 tolerance bearings
- Copper motor windings with thermal protection, for continuous operation, B class insulation
- IP44 motor protection
- Standard supply incorporates electronic controller with dry run protection
